I live in Kent and have been looking on the internet for [used BMW's Maidstone](#) . I had an unfortunate accident and wrote off my used Mercedes. The one thing to be thankful for is that I had no passengers in the car and nobody was injured. I was not driving fast, in fact no more than 30mph. I hit some black ice and skidded into a stationary lorry, which was parked on a side road. The driver and passenger airbag were deployed and the insurance company have declared it a right off. I really value the safety aspect of German engineered vehicles and am going to buy a BMW. I will visit Big Motoring World as they have a huge selection of used cars.
